## ADVANCEMENT OF THE PRACTICE

## DIRECT FROM CDC ENVIRONMENTAL HEALTH SERVICES BRANCH

ika virus, Legionnaires' disease, and to identify gaps in staffing, training, and the Flint, Michigan, water crisis are quiring a response from a prepared, suf workforce. While demands continue to increase, diverse factors such as health department budget cuts and decreased capacity can negatively impact environmental health professionals and programs (Association of State and Territorial Health Of cials, 2014; National Association of County and City Health Of cials, 2013). These compounding factors reinforce the need to under stand the environmental health workforce

ultimately, to ensure preparedness to meet examples of diseases and events re-future challenges. The Centers for Disease Control and Prevention's (CDC) A National cient, and equipped environmental health Strategy to Revitalize Environmental Public Health Services

sists of two components—a comprehensive
